

Prijslijst - November 2009

STREAMZ TURNKEY MEDIA ENCODING SERVERS		
StreamZHD	Turnkey HD server configuration with single-channel video (SDI / HD-SDI) and 8 channels of AES or embedded SDI audio. Real-time HD and SD encodes to uncompressed video and select formats. Hardware HD/SD format conversion. StreamFE software and HD Breakout Box included.	22.495,00
StreamZ-1000xs	Single channel analog turnkey server configuration with a DRC-1000 board, StreamFE software and Stream breakout cable.	10.850,00
StreamZ-1600xs	Single channel analog/digital turnkey server configuration with a DRC-1600 board, StreamFE software and SDI Connector. Optional breakout cable or breakout box required for analog and AES.	11.695,00
StreamZ-2000xs	Dual channel analog turnkey server configuration with a DRC-2000 board, StreamFE software and Stream breakout cable.	11.695,00
StreamZ-2600xs	Dual channel analog/digital turnkey server configuration with a DRC-2600 board, StreamFE software and SDI Connector. Optional breakout cable or breakout box required for analog and AES.	12.495,00
Accessories		
StreamBOB	19" 1RU Rackmount Breakout Box for DRC-Stream, StreamZ, StreamZ Live and TouchStream systems with DRC-1000, DRC-1400, DRC-1600, DRC-2000 or DRC-2600 board.	420,00
Stream Breakout Cable	Video/audio Breakout Cable for DRC-Stream, StreamZ, StreamZ Live and TouchStream systems with DRC-1400, DRC-1600 and DRC-2600 board. [Included with systems based on DRC-1000 or DRC-2000 analog boards; optional for analog/digital models.]	125,00
Stream SDI Connector	SDI-only connection module for DRC-Stream, StreamZ, StreamZ Live and TouchStream systems with DRC-1400, DRC-1600 or DRC-2600 board. [Included with systems based on these boards after April 1, 2008; available as add-on for earlier systems.]	25,00
MEDIA MANAGEMENT SOFTWARE APPLICATIONS		
Live Streaming Encode Management		
Broadcast Manager	Fee per encoding channel on the network. Centralized scheduling, control, status monitoring and failover management of multiple Digital Rapids encoding solutions. Provides automatic failover and "self-healing" recovery to respond to failures in a timely fashion with minimal operational interruption. *Requires StreamFE or StreamLive software.	850,00
BM Maintenance	Yearly Maintenance per encoding channel (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	125,00
Broadcast Manager Backup Server	Broadcast Manager Server software for use as backup to primary Broadcast Manager Server (for server-level failover). Backup Server is locked to primary Broadcast Manager Server.	4.175,00
Automated Scalable Transcoding		
Transcode Manager FE 4 Bundle	Transcode Manager FE software bundle for large studios and enterprise-level operations provides centralized management, automation and load balancing for high-volume transcoding workflows. Distributed transcoding with intelligent job assignment, job failover recovery and enterprise-class features including 3rd-party DB integration, server failover and more. Bundle includes Transcode Manager FE Server, four (4) Transcode Engine Core licenses and 1st year full maintenance. Unlimited additional Transcode Engines (sold separately) can be added to installation.	16.650,00
Transcode Manager LE 2 Core Bundle	Transcode Manager LE configuration designed for high-volume distributed transcoding in smaller studios and workgroup environments. Same automated ease of use and load balancing intelligence as Transcode Manager FE without enterprise-class features. Supports up to 10 Transcode Engines. Bundle includes Transcode Manager LE Server, two (2) Transcode Engine Core licenses and 1st year full maintenance. Up to eight additional Transcode Engines (sold separately) can be added to installation.	8.325,00
Transcode Manager LE 2 Studio Bundle	Transcode Manager LE configuration designed for high-volume distributed transcoding in smaller studios and workgroup environments. Same automated ease of use and load balancing intelligence as Transcode Manager FE without enterprise-class features. Supports up to 10 Transcode Engines. Bundle includes Transcode Manager LE Server, two (2) Transcode Engine Studio licenses and 1st year full maintenance. Up to eight additional Transcode Engines (sold separately) can be added to installation.	13.325,00
Transcode Engine Studio	Single-instance software transcoding engine license. Multiple Transcode Engines are used in conjunction with Transcode Manager to create transcoding "farms" scaling from small to enterprise operations. Maximum configuration is 1 instance per CPU core. Includes all formats of Transcode Engine Core plus DRC Studio AVC Encoder (H.264), DNxHD, MXF, GXF, LXF, Omneon, Dolby Digital / Dolby Digital Plus File Only, AAC, 3GPP (including H.263, H.264, MPEG-4 Part 2, AAC and AMR audio), Red R3D Import. Additional formats optional (sold separately).	4.995,00
Transcode Engine Core	Single-instance software transcoding engine license. Multiple Transcode Engines are used in conjunction with Transcode Manager to create transcoding "farms" scaling from small to enterprise operations. Maximum configuration is 1 instance per CPU core. Format support included with Transcode Engine Core configuration includes VC-1 (Windows Media, Silverlight), MPEG-1, MPEG-2, QuickTime (including MPEG-4 and H.264), AVI, RealVideo, MP3, WAV and image sequences. Additional formats optional (sold separately).	2.495,00
Transcode Engine Core to Studio Upgrade	Upgrade Transcode Engine Core to support all formats included with Transcode Engine Studio.	2.495,00
Transcode Manager FE Backup Server	Transcode Manager FE Server software for use as backup to primary Transcode Manager FE Server (for server-level failover). Backup Server is locked to primary Transcode Manager FE Server (which must be purchased separately).	4.175,00
Transcode Manager Maintenance Plans		
TM FE Maintenance	Yearly maintenance for Transcode Manager FE Server software (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	2.500,00
TM LE Maintenance	Yearly maintenance for Transcode Manager LE Server software (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	315,00
Engine Studio Maintenance	Yearly maintenance per Transcode Engine Studio instance (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	750,00
Engine Core Maintenance	Yearly maintenance per Transcode Engine Core instance (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	375,00
* Basic support includes phone support during regular business hours and email support.		
TRANSCODE MANAGER HOST SYSTEMS		
TM - BM Server Host System	Single Quad Core system designed to be the host server for Transcode Manager or Broadcast Manager Server software. *Transcode Manager or Broadcast Manager software must be purchased separately.	2.095,00
Transcode Engine Host System	Dual Quad Core system designed to host Transcode Manager Engines. *Transcode Engine software must be purchased separately.	5.250,00

**All items on this page include 1st year of maintenance (basic support and all software maintenance updates during that year).
To extend maintenance and support beyond the first year, please view the maintenance tab.**

STREAMZ LIVE -- LIVE STREAMING ENCODERS

MODEL NUMBER	DESCRIPTION	LIST Euro
VC-1/WMV Models		
StreamZ-Live-500 VC1	Single-channel VC-1/WMV 1RU analog SD live streaming encoder. Composite and S-Video inputs; 4-channel audio input (4 balanced, 2 unbalanced). Includes support for advanced VC-1 encoding (includes group profile, ASF muxer, audio/video elementary stream support as well as WMV/WMA support).	4.995,00
StreamZ-Live-1400 VC1	Single-channel VC-1/WMV 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Includes support for advanced VC-1 encoding (includes group profile, ASF muxer, audio/video elementary stream support as well as WMV/WMA support). SDI connection module included; optional breakout cable or breakout box required for analog and AES.	6.695,00
StreamZ-Live-2600 VC1	Dual-channel VC-1/WMV 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Includes support for advanced VC-1 encoding (includes group profile, ASF muxer, audio/video elementary stream support as well as WMV/WMA support). SDI connection module included; optional breakout cable or breakout box required for analog and AES.	9.175,00
AVC/H.264 Models (excluding Flash 9)		
StreamZ-Live-500 AVC	Single-channel AVC/H.264 1RU analog SD live streaming encoder. Includes AAC and MPEG Layer 2 audio. Composite and S-Video inputs; 4-channel audio input (4 balanced, 2 unbalanced). Elementary stream output over RTP/RTSP. (RTMP streaming to Flash Media Server and muxing into Transport Streams available as options).	6.695,00
StreamZ-Live-1400 AVC	Single-channel AVC/H.264 1RU analog/digital SD live streaming encoder. Includes AAC and MPEG Layer 2 audio. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Supports Closed Captioning. Elementary stream output over RTP/RTSP. (RTMP streaming to Flash Media Server and muxing into Transport Streams available as options). SDI connection module included; optional breakout cable or breakout box required for analog and AES.	8.325,00
Flash 9 (AVC/H.264) Models		
StreamZ-Live-500 Flash AVC	Single-channel Adobe Flash 9 (AVC/H.264) 1RU analog SD live streaming encoder. Includes AAC audio. Composite and S-Video inputs; 4-channel audio input (4 balanced, 2 unbalanced). Progressive output only. RTMP stream output to Adobe Flash Media Server.	5.595,00
StreamZ-Live-1400 Flash AVC	Single-channel Adobe Flash 9 (AVC/H.264) 1RU analog/digital SD live streaming encoder. Includes AAC audio. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Progressive output only. RTMP stream output to Adobe Flash Media Server. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	7.250,00
Flash 8 (On2 VP6) Models		
StreamZ-Live-500 Flash VP6	Single-channel Adobe Flash 8 (On2 VP6) 1RU analog SD live streaming encoder. Composite and S-Video inputs; 4-channel audio input (4 balanced, 2 unbalanced).	6.250,00
StreamZ-Live-1400 Flash VP6	Single-channel Adobe Flash 8 (On2 VP6) 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Supports Closed Captioning. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	7.950,00
3GPP/Mobile Models		
StreamZ-Live-500 3GPP	Single-channel 3GPP/Mobile (H.263, H264, MPEG-4 Part 2) 1RU analog SD live streaming encoder. Composite and S-Video inputs; 4-channel audio input (4 balanced, 2 unbalanced).	6.695,00
StreamZ-Live-1400 3GPP	Single-channel 3GPP/Mobile (H.263, H264, MPEG-4 Part 2) 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). SDI connection module included; optional breakout cable or breakout box required for analog and AES.	8.325,00
StreamZ-Live-2600 3GPP	Dual-channel 3GPP/Mobile (H.263, H264, MPEG-4 Part 2) 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). SDI connection module included; optional breakout cable or breakout box required for analog and AES.	10.850,00
MPEG-2 Models		
StreamZ-Live-500 MPEG2	Single-channel MPEG-2 1RU analog SD live streaming encoder. Composite and S-Video inputs; 4-channel audio input (4 balanced, 2 unbalanced). [Note: does not support Closed Captioning].	4.995,00
StreamZ-Live-1400 MPEG2	Single-channel MPEG-2 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Supports Closed Captioning. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	6.695,00
StreamZ-Live-2600 MPEG2	Dual-channel MPEG-2 1RU analog/digital SD live streaming encoder. SDI, Component, S-Video and Composite video inputs; 8-channel audio input (4 balanced analog, 4 unbalanced analog, AES, embedded SDI). Supports Closed Captioning. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	9.175,00
StreamZ-Live Transport Stream Muxer	Adds Transport Stream multiplexing to AVC and/or MPEG-2 modules for StreamZ Live.	1.695,00
Broadcast Manager	Enables a Broadcast Manager Server to control StreamZ Live encoding channel. One license fee required per encoding channel. The Broadcast Manager Server provides centralized scheduling, control, status monitoring and failover management of multiple StreamZ Live encoders.	850,00
RTMP Streaming	Adds support to DRC Studio AVC Encoder (not included) or Ateame AVC Bundle (not included) for live broadcast (streaming) with RTMP protocol for Adobe Flash Media Server. *Requires StreamPro or StreamEnterprise 2.5.1 or higher.	250,00

**All items on this page include 1st year of maintenance (basic support and all software maintenance updates during that year).
To extend maintenance and support beyond the first year, please view the maintenance tab.**

StreamZ Live Premium

MODEL NUMBER	DESCRIPTION	LIST Euro
StreamZ-Live-500 Premium	Single channel analog StreamZ Live streaming encoder premium system with a DRC-500 board and StreamLive Software. * Codec not included; codec option must be purchased from list below.	8.250,00
StreamZ-Live-1400 Premium	Single channel analog/digital StreamZ Live streaming encoder premium system with a DRC-1400 board, StreamLive Software and the SDI connection module. Optional breakout cable or breakout box required for analog and AES. * Codec not included; codec option must be purchased from list below.	9.995,00
StreamZ-Live-2600 Premium	Two channel analog/digital StreamZ Live streaming encoder premium system with a DRC-2600 board, StreamLive Software and the SDI connection module. Optional breakout cable or breakout box required for analog and AES. * Codec not included; codec option must be purchased from list below (Two instances of codec must be purchased for dual-channel model). *Some codecs cannot run two channels on dual-channel models. Please inquire for more information.	11.250,00
StreamZ-Live-5650 Premium	Single-channel video (SDI / HD-SDI) and embedded SDI audio. Real-time HD and SD ingest, down-converted in real time for encodes to selected formats. Output resolution limited depending on codec used. StreamLive Software. No breakout cable or breakout box required for SDI only connections. * Codec not included; codec option must be purchased from list below.	17.925,00

Codec Plug-Ins for Digital Rapids StreamZ-Live Premium Encoders ONLY

MODEL NUMBER	DESCRIPTION	LIST Euro
VC1 Live Encoder	VC-1 / Windows Media live broadcast (streaming) module. Simultaneous archiving to files while streaming. Adds support for advanced VC-1 encoding (includes group profile, ASF muxer, audio/video elementary stream support) as well as WMV/WMA support. Includes support for DRM. Requires StreamLive software.	420,00
AVC Live Encoder	AVC (H.264) live broadcast (streaming) module with AAC audio. Elementary Stream output over RTP/RTSP (MPEG-2 Transport Stream muxing optional). Simultaneous archiving to files while streaming. Requires StreamLive software. One license required per hardware encoding channel.	2.095,00
Flash AVC Live Encoder	AVC (H.264) live broadcast (streaming) over RTMP protocol to Adobe Flash Media Server. Creation of AVC F4V/FLV Adobe Flash 9 files for on-demand applications requires Stream Live 1.02 or higher. Includes AAC-HE and AAC-LC audio, RTMP support. Supports Baseline and Main H.264 profiles; progressive output only.	915,00
Flash VP6 Live Encoder	On2 VP6 (Adobe Flash 8) live broadcast (streaming) module. Simultaneous archiving to files while streaming. Requires StreamLive software.	1.495,00
3GPP Live Encoder	3GPP/Mobile (H.263, H.264 and MPEG-4 Part 2 video with AAC-LC or AMR audio) live broadcast (streaming) module. Simultaneous archiving to files while streaming. Requires StreamLive software. One license required per hardware encoding channel.	1.695,00
MPEG2 Live Encoder	MPEG-2 live broadcast (streaming) module. Output over UDP or RTP. Simultaneous archiving to files while streaming. Requires StreamLive software.	420,00
StreamZ-Live Transport Stream Muxer	Adds Transport Stream multiplexing to AVC and/or MPEG-2 modules for StreamZ Live.	1.695,00
Broadcast Manager	Enables a Broadcast Manager Server to control StreamZ Live encoding channel. One license fee required per encoding channel. The Broadcast Manager Server provides centralized scheduling, control, status monitoring and failover management of multiple StreamZ Live encoders.	850,00
RTMP Streaming	Adds support to DRC Studio AVC Encoder (not included) or Ateco AVC Bundle (not included) for live broadcast (streaming) with RTMP protocol for Adobe Flash Media Server. Requires StreamLive software.	250,00

C2 MEDIA AND DATA DELIVERY

MODEL NUMBER	DESCRIPTION	LIST Euro
C2 Engine	Single-instance C2 Engine. Provides near wirespeed data delivery, shipment management, task routing, bandwidth monitoring and optimization, statistics tracking and policy management with support for multicast, unicast, and satellite delivery infrastructures. Includes 1st year full maintenance.	1.695,00
C2 Core	The C2 data delivery framework provides near-wire speed transfer of large media and data files between contribution, collaboration and distribution points. Includes C2 Management Server software, DRC License Server software, 2 C2 Engines (multicast and unicast enabled) with support for multicast groups, satellite-based delivery (satellite infrastructure required) and unlimited Spark-based desktop clients. Includes 1st year full maintenance.	4.175,00
C2 Engine Maintenance	Yearly maintenance per C2 Engine (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	250,00
C2 Core Maintenance	Yearly maintenance per C2 Core (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	625,00

DRC CARD and SOFTWARE PRODUCT

MODEL NUMBER	DESCRIPTION	LIST Euro
DRC-500	Single channel input PCI card: Composite and S-Video. 4 Channel audio input (4 Balanced, 2 Unbalanced). Includes Stream LE software. Does not include MPEG-1 & 2 codec.	750,00
DRC-1000	Single channel input PCI card: Component, Composite, S-Video with 4 channels of Bal and 4 channels of Unbal audio inputs. Includes Stream LE software and the stream breakout cable.	1.925,00
DRC-1400	Single-channel analog/digital PCI card. 1 SDI, Component, Composite, S-Video with 8 channels of audio including Bal & Unbal analog, AES, embedded SDI. Includes Stream LE software. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	2.495,00
DRC-1600	Single-channel analog/digital PCI card. 1 SDI, Component, Composite, S-Video with 8 channels of audio including Bal & Unbal analog, AES, embedded SDI; plus support for DV through host system IEEE-1394 port. Includes Stream LE software. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	2.925,00
DRC-2000	Two channel input PCI card: Component, Composite, S-Video with 8 channels of audio including Bal and Unbal analog. Includes Stream LE software	2.750,00
DRC-2600	Two-channel analog/digital PCI card. 2 SDI, Component, Composite, S-Video with 8 channels of audio including Bal & Unbal analog, AES, embedded SDI; plus support for DV through host system IEEE-1394 port. Stream LE software. SDI connection module included; optional breakout cable or breakout box required for analog and AES.	3.750,00

Accessories

StreamBOB	19" 1RU Rackmount Breakout Box for DRC-Stream, StreamZ, StreamZ Live and TouchStream systems with DRC-1000, DRC-1400, DRC-1600, DRC-2000 or DRC-2600 board.	420,00
Stream Breakout Cable	Video/audio Breakout Cable for DRC-Stream, StreamZ, StreamZ Live and TouchStream systems with DRC-1400, DRC-1600 and DRC-2600 board. [Included with systems based on DRC-1000 or DRC-2000 analog boards; optional for analog/digital models.]	125,00
Stream SDI Connector	SDI-only connection module for DRC-Stream, StreamZ, StreamZ Live and TouchStream systems with DRC-1400, DRC-1600 or DRC-2600 board. [Included with systems based on these boards after April 1, 2008 available; as add-on for earlier systems.]	25,00

SOFTWARE & PRODUCT UPGRADES

MODEL NUMBER	DESCRIPTION	LIST Euro
Stream LE 2.5 - 3.0	Stream LE 2.5 upgrade to Stream LE 3.0. Includes 1st year maintenance (basic support and all software maintenance updates during that year).	330,00
Stream FE	Upgrade from Stream LE to Stream FE 3.0. Advanced professional software bundle. Includes: Deck control, automatic FTP distribution and E-mail Notification, Watch Folder support, multi-clip batch transcoding, DVD publishing, Thomson MP3 audio encoding, video and audio processing plug-ins, MPEG-2 streaming over UDP or RTP and all features of Stream LE. Required for use with Broadcast Manager and some optional format modules. Includes 1st year maintenance (basic support and all software maintenance updates during that year).	1.695,00
Stream FE Upgrade for Pro or Enterprise	StreamPro 2.5 or Stream Enterprise 2.5 upgrade to Stream FE 3.0. Includes 1st year maintenance (basic support and all software maintenance updates during that year).	1.000,00
Stream FE Upgrade with Format Expansion Bundle 1	Stream FE upgrade for StreamPro or StreamEnterprise software with Format Expansion Bundle 1: Includes DNxHD, MXF, GXF, LXF, Red Camera R3D Import, Omneon import/export and archive file encoding and Dolby Digital Surround (file only). Includes 1st year maintenance (basic support and all software maintenance updates during that year).	2.750,00
Stream FE with DRC Studio AVC Encoder Upgrade	Upgrade for StreamPro or StreamEnterprise users that own Ateame H.264 encoder to Stream FE software with DRC Studio AVC Encoder. Includes: AVC (H.264) archive file encoding and live broadcast (streaming) for applications including Blu-ray and IPTV. Outputs Elementary Streams (to files or native RTP for streaming) only. Supports Baseline, Main and High H.264 profiles; interlaced or progressive output. Audio codec(s) not included. Includes 1st year maintenance (basic support and all software maintenance updates during that year).	1.425,00
Deck Control	Software which provides frame accurate deck control, RS422 timecode interface. For customers who have Stream LE software.	675,00

SOFTWARE MAINTENANCE

MODEL NUMBER	DESCRIPTION	LIST Euro
Stream LE Maintenance	Yearly maintenance for Stream LE software (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	125,00
Stream FE Maintenance	Yearly maintenance for Stream FE software (for each year from year 2 forward). Includes all software "point" updates (e.g., 1.0 to 1.1) and basic support* during that year.	375,00

**All items on this page include 1st year of maintenance (basic support and all software maintenance updates during that year).
To extend maintenance and support beyond the first year, please view the maintenance tab.**

Additional Video Codec's for Digital Rapids Stream Software

MODEL NUMBER	DESCRIPTION	LIST Euro
On2 VP6 File Encoder	On2 VP6 Flash 8 Codec for encoding, transcoding and archiving to files from live, tape-based, or media file inputs. Note: This is not a live broadcast (streaming) codec.	495,00
On2 VP6 File+Live Encoder	On2 VP6 Flash 8 Codec for encoding, transcoding and archiving to files plus live Flash Video streaming.	1,495,00
On2 VP6 File Encoder - On2 VP6 File+Live Encoder	On2 VP6 File Encoder upgrade to On2 VP6 File+Live Encoder.	1,000,00
■ DRC Studio AVC Encoder	AVC (H.264) archive file encoding and live broadcast (streaming) for applications including Blu-ray and IPTV. Outputs Elementary Streams (to files or native RTP for streaming) only. Supports Baseline, Main and High H.264 profiles; interlaced or progressive output. Audio codec(s) not included. *Requires Stream FE.	1,830,00
■ DRC Studio AVC Encoder Bundle	AVC (H.264) archive file encoding and live broadcast (streaming) optimized for VOD and IPTV platforms, plus applications such as Blu-ray. Outputs Elementary Streams (to files or native RTP for streaming) and/or multiplexes into MPEG-2 Transport Streams. Includes DRC Studio AVC Encoder, AAC-HE and AAC-LC audio and Manzanita transport stream muxer. Supports Baseline, Main and High H.264 profiles; interlaced or progressive output. *Requires Stream FE.	3,750,00
■ RTMP Streaming	Adds support to DRC Studio AVC Encoder (not included) or Ateme AVC Bundle (not included) for live broadcast (streaming) with RTMP protocol for Adobe Flash Media Server. *Requires Stream FE.	250,00
◆ DRC AVC for Flash	AVC (H.264) live broadcast (streaming) over RTMP protocol to Adobe Flash Media Server, Smooth Streaming to IIS and Quicktime Streaming, plus creation of AVC F4V/FLV Adobe Flash 9 and AAC Smooth Streaming files for on-demand applications. Includes AAC-HE and AAC-LC audio, RTMP and Silverlight support. Supports Baseline and Main H.264 profiles; progressive output only. Includes Thomson MP3 codec. *Requires Stream FE or Stream LE 3.0 or higher for archive file creation.	915,00
◆ DRC AVC for Flash, File Only	AVC (H.264) creation of AVC F4V/FLV Adobe Flash 9 files and Silverlight IIS Smooth Streaming files for on-demand applications. Includes AAC-HE and AAC-LC audio, mp4 file muxer. Supports Baseline and Main H.264 profiles; progressive output only. Includes Thomson MP3 codec. *Requires Stream FE, Stream LE 3.0 or higher.	675,00
◆ DRC AVC for Web	AVC (H.264) live broadcast (streaming) over RTMP protocol to Adobe Flash Media Server, Smooth Streaming to IIS and Quicktime Streaming, plus creation of AVC F4V/FLV Adobe Flash 9 and AAC Smooth Streaming files for on-demand applications. Includes AAC-HE and AAC-LC audio, RTMP and Silverlight support. Supports Baseline and Main H.264 profiles; progressive output only. Includes Thomson MP3 codec. *Requires Stream FE or Stream LE 3.0 or higher for archive file creation.	915,00
◆ DRC AVC for Web, File Only	AVC (H.264) creation of AVC F4V/FLV Adobe Flash 9 files and Silverlight IIS Smooth Streaming files for on-demand applications. Includes AAC-HE and AAC-LC audio, mp4 file muxer. Supports Baseline and Main H.264 profiles; progressive output only. Includes Thomson MP3 codec. *Requires Stream FE, Stream LE 3.0 or higher.	675,00
■ Ateme AVC Bundle	AVC (H.264) archive file encoding and live broadcast (streaming) optimized for VOD and IPTV platforms. Includes Ateme H.264 encoder, AAC-HE and AAC-LC audio and Manzanita transport stream muxer. Supports Baseline, Main and High H.264 profiles. Outputs Elementary Streams (to files or native RTP for streaming) and/or multiplexes into MPEG-2 Transport Streams. *Requires Stream FE.	5,850,00
Manzanita TS Muxer	Adds MPEG-2 Transport Stream multiplexing to the Group Codec feature of StreamPro and StreamEnterprise. Can be used to multiplex MPEG2 or H.264 video plus MPEG audio, AAC audio, or AC-3 audio (codecs not included).	1,695,00
MXF Import	Adds the ability to import media packaged in the MXF file format. Note: this module "unwraps" the media stored within the MXF file; additional codec's may be required for decoding the compressed media itself. Supports Stream LE or FE 3.0 or higher.	420,00
■ MXF Import/Export	Adds the ability to import and export media packaged in the MXF file format. Note: this module "wraps" or "unwraps" the media stored within the MXF file; additional codecs may be required for encoding and decoding the compressed media itself. *Requires Stream FE (does not support Stream LE).	1,250,00
3GPP/Mobile Encoder for LE	3GPP/Mobile (H.263, H.264 and MPEG-4 Part 2 video with AAC-LC or AMR audio) encoding to files and live broadcast (streaming) powered by Dicas. For Stream LE users (requires version 3.0 or higher).	420,00
3GPP/Mobile Encoder for FE	3GPP/Mobile (H.263, H.264 and MPEG-4 Part 2 video with AAC-LC or AMR audio) encoding to files and live broadcast (streaming) powered by Dicas. For Stream FE users.	420,00
◆ DR GXF Import	Adds the ability to import media packaged in the GXF file format (common with Grass Valley servers). Note: this module "unwraps" the media stored within the GXF file; additional codecs may be required for decoding the compressed media itself. *Requires Stream FE or Stream LE 3.0 software or higher.	330,00
■ DR GXF Import/Export	Adds the ability to import and export media packaged in the GXF file format (common with Grass Valley servers). Note: this module "wraps" or "unwraps" the media stored within the GXF file; additional codecs may be required for encoding and decoding the compressed media itself. *Requires Stream FE (does not support Stream LE).	750,00
◆ DR LXF Import	Adds the ability to import media packaged in the LXF file format (common with Harris servers). Note: this module "unwraps" the media stored within the LXF file; additional codecs may be required for decoding the compressed media itself. *Requires Stream FE or Stream LE 3.0 software or higher.	330,00
■ DR LXF Import/Export	Adds the ability to import and export media packaged in the LXF file format (common with Harris servers). Note: this module "wraps" or "unwraps" the media stored within the LXF file; additional codecs may be required for encoding and decoding the compressed media itself. *Requires Stream FE (does not support Stream LE).	750,00
■ DVCPPro	DVCPPro Codec for import and encoding and transcoding to file from live, tape-based, or media file inputs. Supports DV, DVCPPro 25/50/HD. Includes 608 cc preservation. *Requires Stream FE 3.0 or higher for Quicktime and MXF wrapping.	750,00
■ DNxHD Bundle	Avid DNxHD codec for importing DNxHD files and encoding/transcoding to file from live, tape-based, or media file inputs. *Requires Stream FE; includes MXF Import/Export option.	1,595,00
■ DNxHD	Avid DNxHD codec for importing DNxHD files and encoding/transcoding to file from live, tape-based, or media file inputs. Requires Stream FE and MXF import/export (not included)	420,00
◆ Red Camera R3D Import	Adds the ability to import and decode Red Camera R3D files *Requires Stream FE or Stream LE 3.1 software or higher. Includes 1st year maintenance (basic support and all software maintenance updates during that year).	330,00
